PRICES FOR SPRING 1935

GUARANTEE—Our nursery stock is guaranteed for one year with free replacement where properly planted and given care and attention during the summer. Free planting instructions sent out with orders.

TRANSPORTATION—We prepay all transportation charges where cash is sent in previous to time of delivery except on balled and burlapped evergreen stock, which is generally shipped by freight, f. o. b., Rapid City. If left to our judgment we will adopt the best method of transportation.

PAYMENT—Payment may be made by check, money order, bank draft, or cash. 25% down on C. O. D. orders, balance at time of delivery.

TREE TRIMMING—We are equipped to handle your tree trimming and tree surgery work. If your trees are not healthy and require attention, call upon us and we will be glad to advise you to the best of our ability.

SPRAYING—We are equipped with a barrel spray outfit and can spray your fruit and shade trees. All fruit trees require one or two sprayings if you expect to have fruit free from worms and scab. Local people get in touch with us and we will advise as to the best time to spray. Leaf-rollers and aphids are very bad on American Elm and will injure the trees if not controlled. Trees should be sprayed early, just after the leaves open and again later. See that your trees are kept healthy.

FREE LANDSCAPE SERVICE
 We are rendering free landscape service upon request of our customers. We have three or four men now in our employ who can give you estimates and draw your plans for foundation planting, back yards, rock gardens and lawns. One of these men is located at Lead and we can give you good service in this vicinity as well as other points in the Black Hills and surrounding territory. We have been doing considerable lawn work and we'll be glad to give you a price on a good job.

 Prices on above varieties: \$1.00 doz.

CROCUS
GIANT YELLOW—Clear lemon yellow
MEYERBEER—Purplish striped. Large
MONT BLANC—Pure white
 Price on above varieties: 50c doz.

Spring is the most natural time to plant nursery stock because at this time of the year plants will soon start growth and we will have quick results from our labor. We think of fall as the time to harvest and not to plant; however there are certain bulbs and plants which succeed best when planted early in the fall. They become rooted at this time and are ready to throw up their foliage and blossom stock at the proper time in the spring. Tulips, narcissus, hyacinths, and crocus should be planted only in early fall. Peonies and iris do best when planted at this time.
